## Outreach Club Rules and Regulations

To qualify for the Astronomical League's Outreach and Master Outreach Awards, you need only be a member of the Astronomical League, either through an affiliated club or as a Member-at-Large.

The initial concept is to award outreach just as the Astronomical League currently recognizes Observing Club (each Club offers a certificate based upon achieving certain observing goals): based on a number of outreach events and hours. There are three levels of recognition:

<b>Outreach Award</b>	<p>A minimum of five-2 hour (minimum each outreach) outreach events          Document each event:              Date, time (started and ended), location              What you did for the outreach              Estimage of the number of people attending</p>
<b>Stellar Outreach Award</b>	<p>In addition to the (basic) Outreach Award, the Stellar Outreach recipients will need an additional fifty hours (minimum) in outreach events.          Again, document each event:              Date, time (started and ended), location              What you did for the outreach              Estimage of the number of people attending          The recipient will "report" on one of his/her outreach events; these reports can be used in <i>The Reflector</i> and elsewhere to overview what amateurs are doing in Outreach and share ideas.*</p>
<b>Master Outreach Award</b>	<p>In addition to the Outreach and Stellar Outreach Awards, the Master Outreach recipients will need an additional one hundred hours (minimum) in outreach events          As with the first two levels, document each event:              Date, time (started and ended), location              What you did for the outreach              Estimage of the number of people attending          The Master Outreach Award nominee will report on what seems to work best for their outreach efforts; this can be specific activities, locations, ets. Like with the Stellar Outreach Award, these reports can be used in <i>The Reflector</i>.**</p>

TAS has provided these forms and instructions as an aid to club members in completing their club. If you submit your hours through TAS please use this form and make sure to have the ALCOR approve your entry form by signing and dating it. The ALCOR will then submit it to the Astronomical League for your award.
